

EVOMAX 2 BRANSTON HALL

IDEAL COMMERCIAL CASE STUDY

“EVOMAX BOILERS OFFER A **WARM WELCOME**”

When a Lincolnshire hotel required an emergency fix and replacement of their boilers, **Ideal Commercial Boilers were able to offer a heating solution to fit the short time frame.**

Branston Hall is a popular wedding venue in Lincolnshire, surrounded by 88 acres of typically English woodland and parkland. Built in 1885 for Sir Leslie Alexander Melville, the property was converted into a hotel in 1990. The former stately home has 53 bedrooms, a swimming pool, sauna and a hot tub.

Hinckley Plumbing and Heating Services Ltd started in 1998, and

they cover a variety of installations across the country, varying from commercial, domestic and industrial plumbing and heating.

Branston Hall needed an emergency fix to their boilers, so they called in Hinckley Plumbing and Heating Services Ltd through a recommendation. Knowing that the heating solution would need to be resolved quickly, so no hotel guests were disturbed, it was crucial the installation was done in good time.

“The installation process went really well. The boilers were delivered on time and the application of the flue was

a success. **Everything was completed when it should have been**” said Andy Payne, supervisor.

“The installation process went really well. The boilers were delivered on time and the application of the flue was a success.”

The boilers for this heating solution were three Evomax 100kW boilers, Andy explains: “We decided to fit the Evomax boilers on a Low Height Frame and Header kit because we were governed by the flue and where it could go.”

CASE STUDY FACTS:

LOCATION: BRANSTON HALL HOTEL, LINCOLNSHIRE | **BUILDING TYPE:** HOTEL AND WEDDING VENUE

EQUIPMENT: 3 X EVOMAX 100KW WITH A LOW HEIGHT FRAME AND HEADER KIT

“WE HAVE WORKED WITH IDEAL COMMERCIAL FOR PROBABLY **25-30 YEARS NOW**”

Evomax's lightweight design can be supported by Frame and Header kits, which are available in lower heights to add further ease to installation. These kits offer in-line back-to-back options of **up to six boiler that can create a combined capacity of up to 600kW**. The Low Height Kits are a simple solution for any installation that has a challenging sized plant room. Several options are available to allow for varying outputs.

Andy explained:

“We attended Ideal Commercial's servicing and Commissioning courses, so if needed we could commission them ourselves. However, because they are **supplying free commissioning** at the moment we didn't need to.” As part of Ideal Commercial's Free Commissioning offer, the Ideal Commercial boilers need to be commissioned

within three months of the installation date to qualify for their full warranty.

Branston Hall contacted Hinckley Plumbing and Heating Services Ltd after the installation to inform them that their gas bill has reduced, and the **new boilers were producing more heat for less money.**

“Ideal Commercial are very good with their technical support. If you ring the team, they will sort the problem out there and then.”

“We have worked with Ideal Commercial for probably 25-30 years now. We have fitted everything from their Concords to their new Evomax boilers. It is a good British made product that we get no problems from.” Andy concluded.
