Concord
CXS 40 - 120
ALL MODELS

THE GAS SAFETY (INSTALLATION AND USE) REGULATIONS 1994 impose certain statutory obligations on gas users. This appliance must be installed by a Corgi registered installer.

1. It is ESSENTIAL that the instructions in this booklet are strictly followed, for safe, economical operation of the boiler.
2. Do not obstruct ventilation ducts, grilles or openings in the boiler room, or the passage of combustion and ventilation air to the boiler.
3. Do not store objects around or on the boiler, and keep access clear at all times.
4. Switch off and disconnect the electricity supply before carrying out maintenance work.
5. Do not turn off the boiler if it is to be left unattended in frosty weather.

MAINTENANCE

The appliance should be serviced at least once a year by a CORGI registered installer.

WARNING.

This appliance MUST be efficiently earthed

CLEANING

For normal cleaning simply dust with a dry cloth.

To remove stubborn marks and stains use a damp cloth and mild detergent.

DO NOT use abrasive cleaning materials.

CAUTION. To avoid the possibility of injury during the use or cleaning of this appliance care should be taken when handling edges of sheet steel components.
TO LIGHT THE BOILER
1. Check that the boiler thermostat knob (1) on the control box (2) is OFF.
2. Ensure that the mains gas inlet cock (3) is open (groove in the square head in line with the gas pipe).
3. Press in and release the overheat thermostat button (4).
4. Switch on the electrical supply to the boiler.
5. Ensure that all system controls (time switch, system controls etc.) are calling for heat.
6. Turn the boiler thermostat knob (1) to position 6.
7. The boiler will light at Low rate and the Boiler-on light (5) will be illuminated. If it does not light the Lockout light (6) will be illuminated. Press in and release the Lockout button (7). The controls will reset and attempt to relight.
8. The burner will remain at Low rate for about 3 minutes before going to High rate.
9. Check all connections for gas soundness, using leak detection fluid.
10. Set the boiler thermostat knob and the system controls to the required settings.
11. Turn off the electrical supply to the boiler.

TO SHUT DOWN THE BOILER
For short periods
Turn the boiler off at the time clock or system controls. Wait 6 min. and then turn the boiler control thermostat knob (1) to OFF. Note the frost warning below.

For long periods
Turn the boiler off at the time clock or system controls. Wait for 6 min. and then turn the boiler control thermostat knob (1) to OFF. Note the frost warning below.

FROST WARNING
If frost is likely, leave the boiler thermostat at position 6 and do not turn off the gas cock. This will enable the built-in frost thermostat to protect the boiler. Note that this may not protect remote parts of the system, in which case a separate frost thermostat should be fitted or the system drained and the boiler shut down for as for long periods.

TO RELIGHT THE BOILER
After short periods
Switch on the time switch or system controls and turn boiler thermostat knob (1) to the required setting. The boiler will light providing the external controls are calling for heat.

After long periods
Follow the lighting instructions above. Refill the system if it has been drained.
